Mastering the Art of Analytics – Creating Insight, Driving Change

EagleDream Health delivers a modular, cloud-based, SaaS software solution that utilizes clinical, financial, claims and patient-derived data to manage large patient populations in a quality-focused, cost-efficient manner, supporting your organization's transition from volume to value.

EagleDream Health can help at any point on your journey, whether you're in the earliest stages of gain-sharing contracts or taking on risk and fully accountable care coordination. Our software enables you to reduce costs and utilization, while demonstrating ongoing improvements in quality and outcomes.

Data without insight is meaningless. For healthcare organizations trying to manage volumes of data, EagleDream Health's contemporary software solution will transform your data and reveal compelling and actionable information that will enable you to make better informed decisions and help you achieve your value-based care delivery goals.

Developed by physicians for physicians, we offer a comprehensive suite of software products and services designed to maximize financial success in value-based care delivery while improving the quality of care.

EagleDream
Health

EagleDream Health helps healthcare delivery organizations in the following areas:

Population Health Management
The EagleDream Health platform helps organizations successfully transition from volume/fee-for-service reimbursement to value-based payment contracts. Comprehensive population health management capabilities will assist you in taking on risk in contracting and quality/outcomes management and enable you to create informed, effective, and collaborative providers who together deliver high quality, low cost care that improves outcomes.

Care Management
Care management teams can effectively manage the daily workflow and proactively close gaps in care using EagleDream Health's pre-visit planning dashboard for a population of patients. Multiple risk assessment tools stratify patients on provider schedules according to risk, thereby enabling the appropriate allocation and assignment of care management resources.

PCMH Certification
EagleDream Health delivers the analytics and reporting tools needed to achieve NCQA Patient-Centered Medical Home (PCMH) recognition. Our tools make the medical home transformation both efficient and effective for medical group practices.

Mandatory Reporting
Healthcare organizations can effectively meet federally and state mandated quality metric reporting requirements with the use of EagleDream Health's software solutions.

Network Management & Design
EagleDream Health provides organizations with analysis of claims data identifying and delineating utilization of out-of-network resources. Identification of these savings opportunities allows organizations to identify clinical services that might require enhanced access or improved communication in order to reduce revenue escape to out-of-network entities.

Practice Pattern Variation
Recognized as an industry leader in measuring physician performance, EagleDream Health helps customers harness the power of accurate peer-comparisons of practice pattern variation. Clinical variation analytic insights catalyze productive engagement with physicians to identify low-value care and drive reduction in unwarranted variation.

Gainsharing and Risk Contracting
Highly experienced consultants support providers through the design, negotiation and implementation of value-based payment arrangements. Additionally, our experts help providers negotiate the terms of risk-bearing contracts in order to protect providers you from liabilities outside of their control.

Bundled Payment Analysis
A focused approach to assist clients in the area of bundled payments and value-based payment arrangements, including commercial ACO-like agreements, bundled payments and quality incentives.

About EagleDream Health

EagleDream Health, Inc., is a healthcare software analytics solutions company that delivers a SaaS-based, comprehensive, integrated solution that spans the entire clinical, financial and administrative spectrum. With its sophisticated analytic tools for managing value based care, its modular, tailored software enables organizations to achieve more successful population health management through increased quality of care to patients, reduced costs and greater patient access and engagement. EagleDream Health is headquartered in Rochester, NY.
